

re: XO Communications

Dear FCC Commissioners.

I am very opposed to the proposed restructuring of XO Communications.

- 1) The restructuring is unfair to XO's current shareholders and owners. They will lose their interest in the company without having the opportunity to invest in the company's recapitalization efforts.
- 2) Forstmann Little is a common shareholder, yet it is being allowed to invest in preference to other common holders to obtain a larger share of ownership. This is discriminatory and unfair.
- 3) I am concerned that having a foreign company own 39% of XO will result in the loss of American jobs. Keep ownership and jobs in America.
- 4) Having a foreign owner may prevent XO from succeeding in its plan to secure government business.
- 5) Having a foreign owner will present significant National Security concerns.

I respectfully request that the commission reject XO's petition and does not allow the proposed restructuring to proceed.

I urge the commission to take a stand for individual shareholder rights and disallow this transaction from moving forward.

Thank you for your attention.

Very Truly Yours,
Peter Hyman
